

Experience pulsing nozzle technology by adding EVO Spray, the Capstan AG system available for most sprayer types, and achieve the Blended Pulse accuracy and uniformity in your application.

The operator interface allows for adjustability to application parameters and offers a series of operational modes.

EVO Spray is available pre-installed on Wilscot Booms, or can be retrofitted onto your existing sprayer.

EVO Spray offers a simple cost-effective Blended Pulse system without sacrificing the benefits.

EVO Spray Benefits

- Drift Control through Rate and Pressure
- Boom Section Control with Turn Compensation
- Rate Stabilization using Rate Sync
- Real-Time System Feedback & Diagnostics
- Up to 16 Sections.

EVO™ *Spray*

For Turf Applications
